

Sam Flynn

Bozeman / Helena, MT · (406) 410-0101 · sammichaelflynn@gmail.com · linkedin.com/in/sam-flynn-73487033b

U.S. citizen · Driver's license and own vehicle · Available May – Aug 2027 and part-time during the school year

EDUCATION

Montana State University, Bozeman, MT

Expected May 2030

Intended major: B.S. Computer Engineering · Biomedical Engineering minor

- Entered with ~60 AP and dual-enrollment credits · Scholarships: MUS Honor, MUS STEM, Reach Higher Montana
- Current coursework: Data Structures (CSCI 232), Multivariable Calculus (M 273)

Capital High School, Helena, MT

2026

Valedictorian (1 of 313), 4.0 GPA · AP Scholar with Distinction · Helena Youth of the Year, Helena Exchange Club (2026)

ENGINEERING PROJECTS

MSU Formula SAE: Electronics / Data Acquisition subteam

Fall 2026 – present

- Building the car's data acquisition system with a small group, including LoRa telemetry, Ethernet, and integration with the power distribution module (PDM)

FTC Robotics Team 17097 Protostars: Captain (2025–26), Lead Programmer and CAD

2024 – 2026

- As captain (2025–26), wrote all of the robot's Java code (multithreaded sensor input, PID control, autonomous pathing with Pedro Pathing) and designed the full robot in Fusion 360
- Led a ~10-member team: ran the build schedule, trained members, led judge interviews; team raised ~\$20K
- Awards: 1st Think (MT State, 2025) · 3rd Inspire (MT State, 2026) · 1st Inspire (Helena regional) · Edmonton premier event (2025)

River temperature-mapping logger (KF2 Consulting)

2022 – 2025

- Assembled an EnviroDIY Mayfly logger with added GPS and temperature sensors and wrote its Arduino C++ firmware to map water temperature from a boat drifting downstream, uploading readings over an LTE modem to a ThingsBoard cloud dashboard; rough prototype that produced usable data

Water-quality dashboard for Hamilton Ranch (KF2 Consulting client)

2025 – present

- Wrote a Python Shiny web app that pulls EnviroDIY logger data from Monitor My Watershed, cleans it with pandas, and shows it in a readable dashboard the client uses

UpLift high-altitude balloon payload (Hack Club Apex, team project)

2026

- Designed the payload enclosure in Fusion 360 with swappable insulation holders; contributed to the ground-station receiver code; drove chase and recovery

EXPERIENCE

IT Intern (Tier 2 work), Information Systems of Montana

July 2025 – July 2026

Managed IT provider, Helena, MT

- One of four helpdesk technicians; handled 25–50 tickets a week at Tier 2 level
- Built and imaged 100+ client workstations on the bench with FOG and USB tools (up to 20 in a day); did onsite hardware troubleshooting and drive replacements
- Wrote build and onboarding checklists and fix write-ups; helped train two new full-time technicians

Field and Data Technician (part-time), KF2 Consulting for Save Wild Trout

2022 – 2025

- Helped deploy and maintain 34 water-quality loggers on four Montana rivers; took solo wading flow measurements

SKILLS

Embedded / firmware: Arduino C++ (Mayfly logger firmware), GPS and temperature sensor integration, LTE modem upload to ThingsBoard, LoRa (learning)

Programming: Java (multithreading, PID control), Python (pandas, Shiny, Plotly), some C++ · Git · Linux / Bash

Hardware and design: soldering, basic multimeter use, Fusion 360 CAD · HEC-RAS / RAS Mapper, QGIS

IT: Windows Server / AD, Entra ID, networking, Proxmox, TrueNAS, Sophos / OPNsense

HONORS AND ACTIVITIES

- Business Professionals of America: 4th in the nation in two IT events (2025)
- 53rd of 649 teams at LIT CTF 2025 (small team) · Certs: Lenovo PC Service Tech, 3× Cisco CCST, Sophos, Datto
- Student leader, church youth group: helped run it and plan events for years without an adult leader
